CNC Machinist - Swing / Graveyard

Min. 5 years experience in setup and operation of Fanuc controlled (horizontal/vertical) mills and lathes. Good math skills a plus. Also edit G&M Code programs. Variety of machining from large weldments to small parts in many different materials. **(Clackamas/Vancouver)**

Welder - Ability to read blueprints and pass a 3G flux core weld test. Sub Arc, Tig & GMAW helpful.

Fabrication Mechanic - Read and interpret all types of drawings and sketches, lay out and assemble with speed and accuracy, without the aid of supervision. Identify structural steel shapes, cut to length, lay-out and fit-up welded or bolted detail, show weld sizes, piece marks, direction marks, etc. Develop, bend, roll, build up, and assemble various types of plated assemblies and structures.
